

Spraymiser

Shielded sprayers for band treatment of weeds

The Spraymiser range of shielded band sprayers offers a highly economical and efficient way of controlling weeds in vineyards, bush crops and orchards, as well as roadsides, fence lines and amenity areas.

- Minimised risk of spray drift due to shielded design
- Wide range of working widths
- Traditional hydraulic pressure nozzle or CDA (Controlled Droplet Application) atomiser option for low volume application
- Lightweight, compact and easily fitted
- Compatible with most ATVs, UTVs and tractors

Shielded sprayers for banded weed control

Shielded to minimise the risk of spray drift, the Spraymiser provides exceptional control of weeds using either traditional hydraulic pressure nozzles (HiFlo models) or vertically mounted CDA atomisers.

The innovative CDA atomisers feature a recirculation system with the design allowing for a low profile shield to fit around the spray heads. Spraymiser CDA units incorporate a control system which monitors the flow of each individual spray head for maximum performance. The system includes a light indicator to monitor the correct operation of CDA atomisers.

With the ability to achieve spray volumes as low as 20 litres per hectare with CDA option, the Spraymiser range offers a highly economical and efficient method of weed control.

Spraymiser can be simply attached to the rear of an ATV, tractor 3 point linkage or any suitable vehicle with 12 volt DC supply. Furthermore, different width models are available to cater for

most weed control requirements. Hinged wings are available on larger Spraymiser 1800, 2000 and 2400 units to facilitate ease of transportation.

The units are designed to be operated at speeds in the range of 4 – 10 kph.

Specification

Model:	Nominal Spray Width	Typical Application Rates	Total Weight
Spraymiser 1200 HiFlo	1200mm	100 – 500 l/ha	12kg
Spraymiser 1200 CDA	1200mm	20 – 40 l/ha	12kg
Spraymiser 1800 HiFlo	1800mm	100 – 500 l/ha	18kg
Spraymiser 1800 CDA	1800mm	20 – 50 l/ha	18kg
Spraymiser 2000 HiFlo	2000mm	100 – 500 l/ha	19kg
Spraymiser 2000 CDA	2000mm	20 – 50 l/ha	19kg
Spraymiser 2400 HiFlo	2400mm	100 – 500 l/ha	25kg
Spraymiser 2400 CDA	2400mm	20 – 80 l/ha	25kg
