Localisation of the fertiliser on the seed (optional)

- 1) Flat processing roller
- 2-3) MINIMAX (patented) volumetric distributor for granulate and fertilizes distributors
- 4) Electronic hectare counter
- 5-6) Seed control monitor

Shallow seeding cutter

Normal seeding cutter

Deep seeding cutter

Normal seeding cutter

- 11) Single row shoes
- 12) Broad seeding shoes (6 cm)
- 13) DR shoes (double row) 5 cm
- 14) DR shoes (double row) 7 cm
- 15) Seed plate for single row and broad seeding
- 16) Seed plate for double row

The new OLIMPIA seed drill has been designed to house 2 distributors like the ones installed on the ORIETTA model. The seeds are planted in 2 rows per element. The distributors can move sideways to cover 4 to 9 cm inter-rows.

The minimum distance between rows is 7 cm with the seed press wheel.
