

# Proven design and quality

**Economy - Versatility**

# N-SERIES

# Booms

All booms for the N-Series are zinc-phosphate treated before being coated with polyester powder. This with a proven design ensures long and reliable use of the boom.

## SB

The 20, 26 and 33 foot SB booms are directly mounted to the frame. The position of the boom can be altered to accommodate for various crop heights.

## MB

The 40 foot MB boom features a trapeze suspension for self-stabilization and prolonged boom life.

All booms have an adjustable spring loaded break-away to protect the boom in case of accidental encounter with an obstacle in the field.

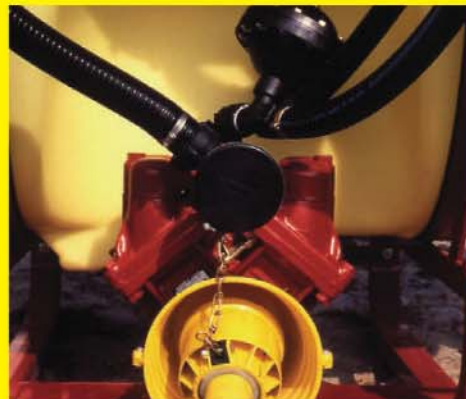

### Controls

HARDI manual or electric control: A long list of standard features which ensure accurate and reliable application of all plant protection chemicals. (Spraymate rate controller also available)

### Pump

HARDI Diaphragm pumps are designed for the application of crop protection products and liquid fertilizers. The principle of the HARDI diaphragm pump separates the liquid from vital parts of the crankshaft and bearings. This makes for years of dependable service.

### Tank

The high-impact polyethylene tank has a deep sump that ensures complete emptying of the tank. The tank design maximises liquid agitation

The single SNAP-FIT nozzle holders have a built-in non-drip diaphragm check valve. The non-drip valve ensures no dripping from the nozzles when the main on/off is closed. The SNAP-FIT system furthermore ensures that all nozzles are in the correct position. A large range of high quality HARDI nozzles is available to suit any spray task.

### Boomless Option

Pasture Boom with 50 Ft Spray width (1303 pump recommended)

# Specifications

Tank Size (gal)	Boom Width (ft)	Boom Model	Pump Model	Pump Capacity (gpm)	Dimensions (in) L x W x H	Weight (lb)
