

# Bed Shaper

**MODEL 1235**

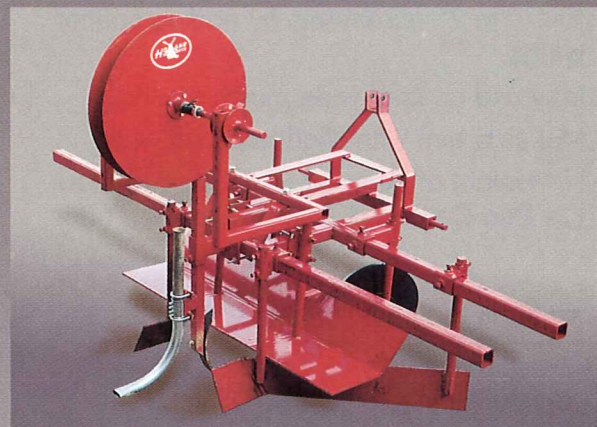

## Adjustable wings create bed widths from 18" to 4 feet wide.

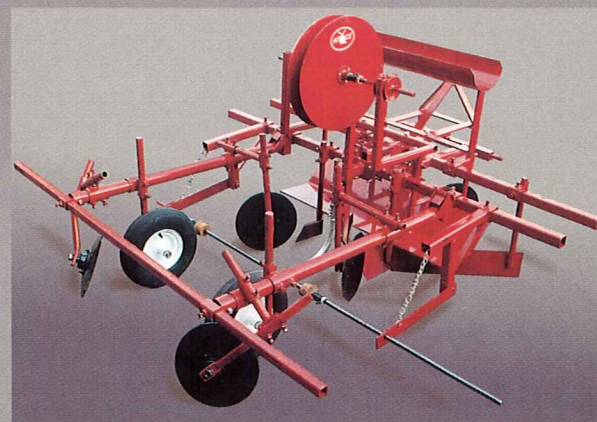

Holland's Bed Shaper quickly and uniformly creates the right size bed for your crop. Soil is broken with the advance pair of adjustable coulter blades, then gathered to the center of the machine where it forms a firm bed across the full width. The adjustable, gathering wings, slide on the parallel tool bars to allow the preparation of beds from 18" to 4 feet wide. Bed heights can be 4", 6", 8", or 10". Custom bed heights can be ordered for specific crop requirements.

The 1235 is also available with expanded use capabilities for special crop conditions. An irrigation tape dispenser, or, a combination irrigation tape dispenser and Holland's Mulch Layer. The versatility lets you use the same machine for such vegetable crops as: sweet corn, squash, melons, peppers, tomatoes and strawberries.

The trailing tool bar can also support up to three model 1050 utility transplanters or two model 1600 transplanters.

Model 1235 with irrigation attachment

Model 1235 with irrigation attachment and Holland's standard mulch layer.
