

SPECIALIZED TRANSPLANTERS AND EQUIPMENT

Mulch Layer

The first step for the fresh market vegetable grower. The newest design in laying mulch comes from HOLLAND. New front leveling blade and floating press wheel frame combine with spring tension roll of mulch to give you wrinkle free laying of mulch. Mounts on three point hitch of tractor. Welded tubular frame to give dependable service for years to come. Send for separate literature.

Mulch Pot Transplanter

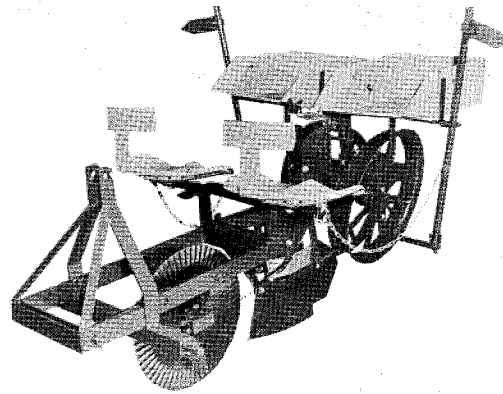

Model #1265 One row transplanter designed to plant potted plants through plastic mulch or into bare ground. Specially designed, heavy duty spades, pierce the mulch, dig a hole in the ground and set the pot and plant upright in the opening. Packing wheels press the soil back around the potted plant. Will handle all size pots, from 1" to 3", round and square. Plant spacing from 12" to 84". Available with or without watering system. For level ground or bed planting. Also available for multi-row planting. For additional information write for brochure.

Mulch Digger

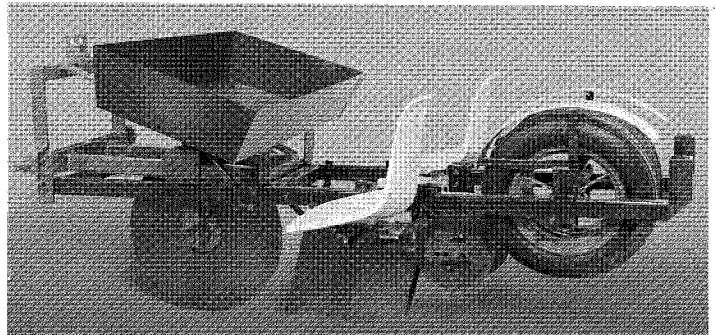

Here's the answer to the question, "What do you do with the plastic?" This new mulch digger is the solution to the small growers problem. Now the small grower can raise 5 to 10 acres on plastic and not have to worry about how to get rid of the mulch. Mounts on Cat I three point hitch.

Twin wings dig underneath the edges of your plastic and raise it so you don't have to dig for those pieces that break off in the ground. More information on separate literature.

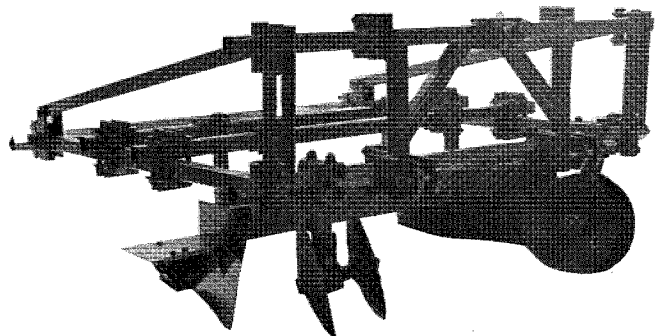

Tree Transplanter

Model #1550T This 3 pt. hitch, one row tractor mounted planter comes equipped with 20" coulters, 10" deep furrow opener, extended heavy duty frame, 2 seats, plant boxes, stands and "A" frame hitch. A low cost way for quick, easy planting of small evergreens. For use in tilled soil. Not recommended for sod. Two more models available for planting in sod.

Old Faithful

Model #1525 True to its name, the Old Faithful is a regular workhorse. Sure fire operation, with many features found in other popular Holland Transplanters. Easily handles bulbs, pots, roots, flowers, vegetables and even nursery stock or trees from 3" to 3' tall. For planting 7" to 15" deep—2" to 4" wide—with steel or rubber tire packing wheels. Send for separate literature. Many options to fit your various needs.

Row Bedder

Here is the ideal way to make your raised beds. This bedder is available with a Cat I or II hitch, and the sled "floats" to the contour of your land. Large twin discs throw the soil under the sled which compacts it to form a uniform raised bed—all in one easy pass. Available in 1 row or multi row models with optional polymer liners to eliminate soil sticking to the inside of shaper.

OTHER SPECIALIZED EQUIPMENT

Celery, Onion, Seedling Self-Propelled; Bed Shaper with planting units, Self-Propelled strawberry planter and Nursery units.
