## THE PLOTTERS' CHOICE

### FOOD PLOT PLANTERS

Allows today's land management teams to plant virtually any seed varieties available. Our unique metering system will accurately and consistently calibrate from small grasses or brassicas up to large grain...Clover to Corn, Sorghum to Soybeans, and everything in between! With the optional Warm Season Grass Box, even fluffy native seeds can be planted.

The Plotters Choice gives you two seeding options: Drilling in rows for large grains, or Solid Stand Planting for tighter germination. Switching between the two seeding styles takes minutes. Available in 3-point or ATV/UTV Pull-Type.

## HERD BROADCAST SPREADERS

### FOR SEED OR FERTILIZER

Since the 1940s, Herd Seeders have been the industry standard for broadcast spreaders. With spreaders to mount behind ATVs, Side-by-Sides, or on 3-point hitch of your tractor, the Herd Seeders have a fit for you. With agitators in every machine, calibration of seed or fertilizer is a snap. Broadcasters by Herd will consistently and accurately meter and spread seed or fertilizer with minimum waste.

## CULTIPACKER ROLLERS

### FOR 3-POINT HITCH

Following a broadcast seeder with a cultipacker has proven results in extra germination. Not only are you guaranteeing seed-to-soil contact, but a cultipacker will also firm up the seedbed for final level.

Kasco's cultipackers are constructed of the same cast-iron press wheels used on all Kasco drills. Heavy duty construction for heavy duty results.

MODEL	DESCRIPTION	WEIGHT
KP-72	CULTIPACKER, 3-POINT HITCH. 6' WIDE	460#
KP-96	CULTIPACKER, 3-POINT HITCH. 8' WIDE	620#
