

TRACTOR MOUNTED DRAWBAR FOR STANDARD 3-POINT HITCH

3-MD-45 Four-Section drawbar folded in transport position.

One, two, three and four-sections are available to fit most standard harrow sections, open or closed end 5', 5'6" and 6' wide. One and two-section drawbars are one piece tubular steel with standard three point hitch.

Three-section folding drawbar folds to one-section wide.

Four-section, three-point hitch drawbar – folds to two-sections wide. One-section on each side folds up for easier transporting.

Two parking stands are furnished with each wing model.

Lift Arms – High arch for maximum section clearance – Extra heavy pipe for durability.

Stabilizing Chain – on four-section, a chain is hooked from the front of the tractor to the wing boom for extra strength.

NOTE: Standard 3-point hitch strong and rugged for cat. II or cat. I hitch.
