SEED SPIDER SEEDING

The range of Seed Spider seeding equipment is rapidly expanding. At the heart of each machine is the electronic seed metering system, powered by high torque A-Max motors and our EMF feedback controller. Click below to see our range of seeders, planters and drills.

All Seed Spider equipment is manufactured to the highest standards using only the best quality materials. The use of precision laser cutting and CNC machining ensures that components are manufactured to the high standards required. All welding is carried out by certified tradespeople who undergo regular testing - the result is a durable product that you can rely on to meet all your seeding requirements.
