

Chain-Driven Units

Available for seeding single or double rows. A base plate is standard for general purpose mounting to tractors or implements front or rear. The drive shaft is equipped with a sprocket, and a special split drive sprocket is provided to attach to your tractor or implement. Each hopper comes with three seed plates. Big 9½ quart capacity hopper.

Model 10781X

single spout hopper. Three seed plates with a total of 39 seed metering adjustments. Seed spout provided.

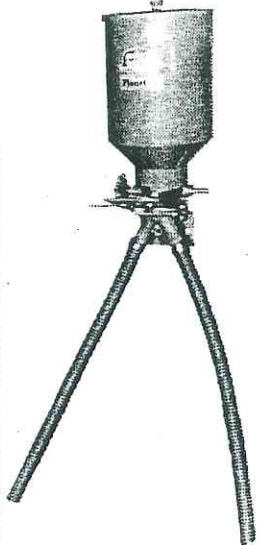

10039X

Narrow brush feed wheel for gentle handling of fragile seeds in single spout hopper.

Model 8197X

double spout hopper. Three special seed plates with a total of 39 seed metering adjustments. Seed flow is divided at the seed plate for greater accuracy. Double seed spouts are provided.

96084X

Wide brush feed wheel for double spout hopper. Provides gentle handling of fragile seeds.
