

SEEDERS

Solex Multipurpose Planter Versatile Vegetable Seeder

The Solex multi-seed planter is built around a traditional design for both seeding and fertilizer application. Accurately plants all garden crops.

Accurately place 34 to 650 pounds of fertilizer per acre.

Change seed plates by simply removing wing nut. Comes with four seed plates & four distance gears for wide selection of crops and planting distances.

Simultaneously plants and places fertilizer

Set seed depth with handle. Opener floats independently of press wheel provides consistent planting & metering.

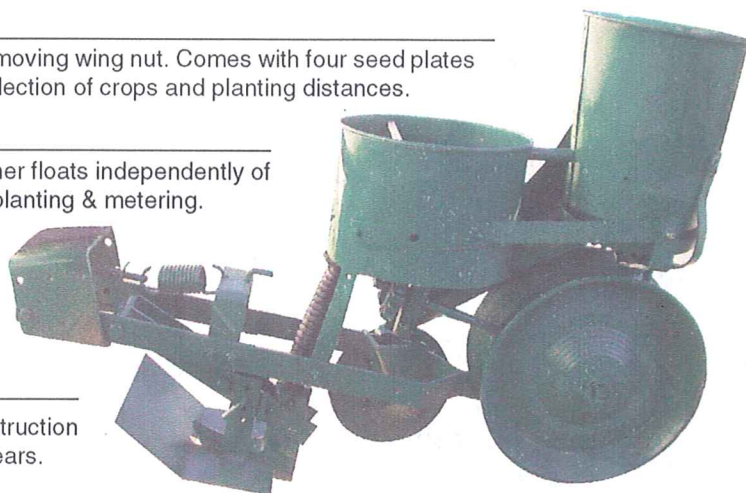

Wing nut controls fertilizer application rate.

Deep-Vee seed opener promotes fast germination, early emergence and uniform stands.

Split-rim concave cast iron press wheel firms seedbed, but leaves loose zone directly over seeds.

Rugged Cast iron and steel construction for quality you can count on for years.

Dirt scrape keeps press wheel free from clods

The Solex Multipurpose Planter: Versatile, Accurate Metering for All Popular Garden Crops.

Gentle, No-Damage Metering

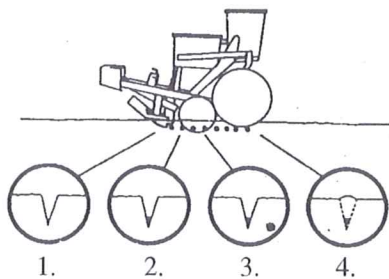

No Seed Damage With Simple Gravity-Drop Hopper:

Seed flows past a partition, where it is picked up by rotating seed plate. The seed then drops through an opening via the gentle action of gravity. Spout delivers accurately metered seeds to the ground.

No brushes fingers or knockers to damage seed.

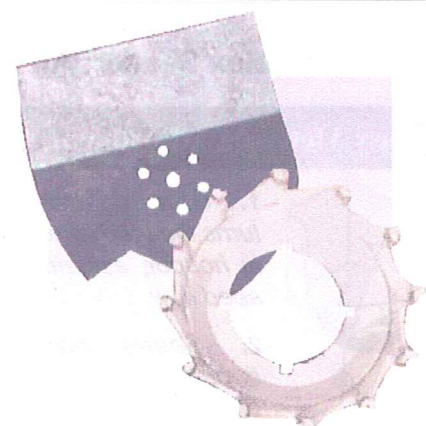

Deep-Vee Seed Opener

Seed Opener promotes germination, emergence, & uniform stands:

1. Deep Vee sword cuts even, uniform, V-shaped furrow.
2. Seeds are placed at uniform depth.
3. Fertilizer is applied beside seedbed, where young roots find early nourishment.
4. Press wheel firms soil, but leaves a loose zone over seed to ease emergence.

Cole/Powell 12MX Compatible

Solex Seeder parts are tested 100% interchangeable with Cole/Powell 12MX seeders, so you can be sure Solex parts & accessories provide exact replacements for your older 12MX™. Now you have an affordable source for those hard-to-find parts.

SEEDERS

Solex Seeder Vegetable Drills, Toolbars, Parts, and Attachments

Rugged Cast iron and steel construction for quality you can count on for years.

Large capacity five quart hopper is standard.

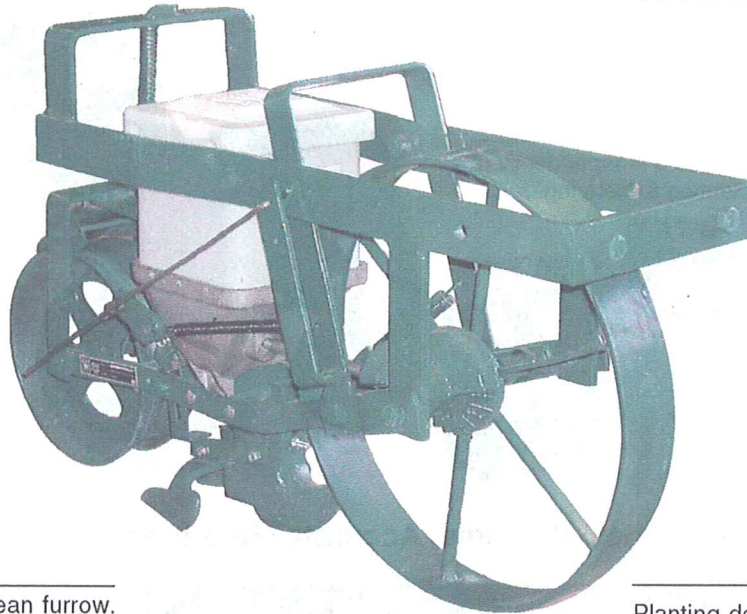

Seed flow is automatically cut off when unit is lifted on models with floating hitch

Spring loaded dirt scrape prevents build-up on press wheel

Press wheel is almost 3" wide with concave design firms the soil, leaving a loose zone directly over the seeds. Promotes good emergence.

Floating coverer pulls dirt over seeds. Amount of float is adjustable.

Sword seed opener slices a clean furrow. Seed openers are available for all needs.

4" of float designed into floating hitch permits each drill to follow the contours of the ground independently

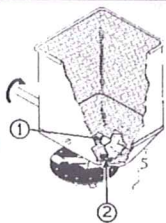

Large 3" wide front wheel levels the seed bed and provides steady power to the hopper

Enclosed gear drive provides positive power

Planting depth is set by a wing nut on the seed opener. No fitted tools are needed.

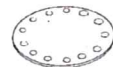

The Solex Seeder: An Affordable New Implementation of A Classic Planter Design

Easy Metering Adjustment:

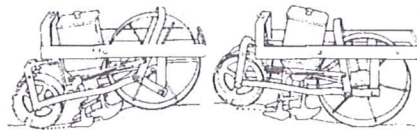

1. Ground drive turns the feed wheel in hopper, assuring seed flow.

2. Seeds pass through hole in seed plate. The size of the hole controls the metering of seed

A selection of seed plates with holes ranging from 3/32" to 3/4" are included with each planter.

Floating Chassis:

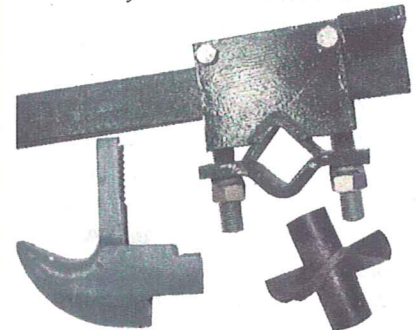

4" of Float:

Cradle bracket allows the drill to float a full 4" up and down.

Unique spring suspension permits each drill to follow the contours of the ground independently. This makes for uniform seed depth in most terrain.

Planet Jr.™ Compatible

Solex Seeder parts are tested 100% interchangeable with Planet Jr.™ seeders, so you can be sure our parts & accessories provide exact replacements for your older Planet Jr.™
